

Type: FC2

Flexible Metallic Conduit

APPLICATION

Extra flexible metal conduit, general purpose for electrical installation, lighting systems, under floor wiring, fiber optic & instrumentation, security, offshore and underground projects, machines & plants connection in electricity, metal, glass and ceramics industry.

STRUCTURE

Helically wound inter-locked profile

MATERIAL

GL: Galvanized steel acc. to EN10346

SS: Austenitic Stainless Steel AISI 304/316

•IP 40 acc. to IEC60529

•Temperature range: -45° C to +300° C

Classification coding for conduit systems

Acc. To IEC 61386-23 : 435641402414
