

Type: FC2T

Special Flexible Metallic Conduit

APPLICATION

Flexible & pliable metal conduit, for cable protection in electrical installations of heavy and telecommunication industries e.g. instrumentation, electric control units, automation systems, automatic apparatus, security & alarm systems, robotic applications, public phone, microphone and fiber optic.

The pliable (semi-flexible) conduit can remain in the chosen position of bending. (Type FC2T-PL)

STRUCTURE

Helically wound inter-locked profile

MATERIAL

Austenitic Stainless Steel AISI 304/316

- IP 40 acc. to IEC60529
- Temperature range: -60° C to +600° C

Classification coding for conduit systems

Acc. To IEC 61386-23 : 435721404010
